

LOCKERS

NEW

Introducing Metpar's standard metal locker collection. This style features a universally popular design, sturdy and reliable construction, and delivers years of trouble-free service. Featuring 16-gauge louvered doors, frames, and bottoms and 25-gauge tops, sides, backs, and shelves. Offering the most value for typical locker applications, this collection is available in a full range of spacious sizes and configuration styles. Our standard metal locker line is the most popular metal locker style sold in the United States.

FEATURES

Number Plate Blank number plate with appropriate fastening hardware.

Hat Shelf Upper shelf provided with single tiers only.

Coat Hook (1) Double and (2) single prong coat hooks with attachment hardware.

Durable Finish Rust inhibitive epoxy-hybrid power, baked until cured. Smooth powder coated finish.

Recessed Handle Recessed, stainless steel handle with finger lift. Can accommodate built-in combination or key locks.

3 Point Latching Secure, multi-point latching system with a lock bar that rides vertically and releases the door from the frame to unlock it.

Standard Louvers Ventilation slots are located at the top and bottom of door frame to allow for daily ventilation.

Full Loop Hinge Full loop, tight-pin construction. With 5-knuckle 2" hinges in door slot, riveted to the door and frame.

Legs Standard 6" high legs attached to the frame.

TIER OPTIONS

1-TIER

Single tier style consists of one, full length compartment with a single door, convenient upper shelf, and interior hooks. This is the most popular and widely used locker style and provides ample storage for full length garments with a shelf for personal items.

2-TIER

Double tier style consists of two openings of equal size, providing storage for two people. This is the second most popular locker style, provides twice as many lockers in the same space, and is designed for short period use, or where short coats and jackets are worn.
